2246 Starr's financial and legal problems began to surface in the late-1990s after he was sued by [[Sylvester Stallone]] in connection with the [[Planet Hollywood]] restaurant chain and Starr's alleged role in Stallone's $10 million loss. As his financial world began to crumble, Starr's then-wife, Marisa Vucci Starr, resigned as Starrco's office manager.&lt;ref name=&quot;VanityFair&quot;/&gt; This left only Starr's son, Ron Starr (identified though not a subject of  the indictment as Ron''Star Bristol''), also an attorney and then co-Chief Compliance Officer, as the only family member left at the company. At the time of Starr's arrest, Ron Starr, along with the company's other co-Chief Compliance Officer, were-with the assistance of outside counsel-conducting an internal investigation into Starr's conduct, and had already forced Starr to surrender signatory authority over all client accounts.  Ron Starr then proceeded to assist the authorities in his father's prosecution and continues to work as a financial adviser in Manhattan.

2260 &quot;'''Sinner's Prayer'''&quot;  is a song by American rock musician [[Sully Erna]]. It is the [[lead single]] from his 2010 debut album ''[[Avalon (Sully Erna album)|Avalon]]''. The song was originally written for Sylvester Stallone's blockbuster ''[[The Expendables (2010 film)|The Expendables]]'' but later taken off the film and soundtrack during post-production. However, the song is reinstated back in the film in the extended director's cut during the films new opening credits sequence.
2261 On September 25, Sully Erna told the Artisan News Service in a video interview that he was approached to record &quot;Sinner's Prayer&quot; for this year's [[Sylvester Stallone]] blockbuster &quot;[[The Expendables (2010 film)|The Expendables]]&quot;, which will also feature [[Jason Statham]], [[Jet Li]], [[Mickey Rourke]] and [[Randy Couture]].&lt;ref&gt;[http://www.metalrage.com/news/52034/godsmack_singer_hooks_up_with_sylvester_stallone_for_movie_soundtrack.html/ &quot;Sully Erna Working on The Expendables soundtrack&quot;] ''Metalrage.com''. 2290 *'''Listify, then delete''' - It seems to be undisputed that the award is [[WP:N|notable]] (as a topic) and note''worthy'' (within articles). However, the standard for categorization is much higher: a characteristic must be ''defining'' for the subjects being categorized. Obviously, if a characteristic is not noteworthy, then it is almost certainly not defining; however, the reverse is not true: a characteristic can be noteworthy but still non-defining.&lt;br /&gt;In the case of award categories, consensus is and has been to listify except when the award is among the highest recognitions in the field. The Golden Raspberry Award does not reach that standard, and being a recipient of the Award does not appear to be defining for most of the people being categorized. After warning them on their talk page that sourced content deletion without explanation appears as vandalism, they continued to blank the information, but included an edit summary that makes assertions about Stallone's personal life without including any sources to back up the removal. I again explained that we need to use [[WP:RS¦reliable sources]] to confirm content, and pointed the IP to the article talk page to outline their argument and sources; instead they simply blanked the content again. 2338 '''''Bullet to the Head''''' is a 2012 American [[action film]] directed by [[Walter Hill]]. The screenplay by [[Alessandro Camon]] was based on the French graphic novel ''Du plomb dans la tête'' written by [[Alexis Nolent¦Matz]] and illustrated by [[Colin Wilson (comics)¦Colin Wilson]]. The film stars [[Sylvester Stallone]], [[Sung Kang]], [[Sarah Shahi]], [[Adewale Akinnuoye-Agbaje]], [[Christian Slater]], and [[Jason Momoa]]. Alexandra Milchan, [[Alfred Gough]], [[Miles Millar]], and Kevin King-Templeton produced the film. The movie follows a hitman (Stallone) and a cop (Kang) who are forced to work together to bring down a corrupt businessman (Akinnuoye-Agbaje) after they are targeted by the businessman's assassin (Momoa).

2449 *''[[First Blood]]'' (1982). Refusing to use a [[Stunt performer¦stunt double]] for certain scenes, [[Sylvester Stallone]] consequently suffered numerous serious injuries during filming. Instances include him having several ribs broken performing the stunt himself three times in which [[John Rambo]] escapes being pursued from Deputy Art Galt ([[Jack Starrett]]) by jumping off a cliff landing on tree branches. He suffered bruises to his back after filming 19 takes of the jail scene where Galt clubbed Rambo with a nightstick. He seriously injured his hand, almost losing his thumb after failing to realize that his hand was on the top of a gunfire squib that went off filming the scene where Rambo eludes the guards in the abandoned mine shaft. During the scene where Rambo is chased by the police on the stolen motorcycle, the stunt driver for [[Brian Dennehy]], [[Bennie Dobbins]], suffered a lumbar compression fracture performing an eventually deleted take of the stunt where the police car jumps the railroad. Dobbins would die from a heart attack in 1988 while filming ''Red Heat''.&lt;ref name=&quot;Cracked&quot;/&gt;&lt;ref&gt;{{cite web ¦url=https://www.film89.co.uk/fact-files-no-5-first-blood-1982/ ¦title=Fact File - No.5 - First Blood (1982) ¦first=Neil ¦last=Gaskin ¦website=Film '89 ¦date=16 December 2017 ¦access-date=22 August 2019 ¦archive-date=22 August 2019 ¦ archive-url=https://web.archive.org/web/20190822044643/https://www.film89.co.uk/fact-files-no-5-first-blood-1982/ ¦url-status=live }}&lt;/ref&gt;

Demanding a sense of realism in the boxing match between [[Rocky Balboa]] and [[Ivan Drago]], Sylvester Stallone and [[Dolph Lundgren]] agreed to legitimately spar with each other. Stallone was airlifted from Canada to St. John's Hospital in [[Santa Monica, California]], and placed on intensive care for eight days after Lundgren delivered a hard punch to his chest, causing his heart to swell and his blood pressure to exceed 200.&lt;ref name=&quot;AICN&quot;&gt;{{cite web ¦ url=https://www.aintitcool.com/node/30932 ¦ title=Stallone Interview With Ain't It Cool News ¦ publisher=Ain't It Cool News ¦ access-date=28 June 2013 ¦ archive-date=30 September 2018 ¦ archive-url=https://web.archive.org/web/20180930092542/http://www.aintitcool.com/node/30932 ¦ url-status=live }}&lt;/ref&gt;&lt;ref name=&quot;BBC&quot;/&gt;

2468 :I second Domins Vobisdu's recommendation above about watching dubbed movies and TV series, although in general I think you should steer clear of dubbed-to-German Hollywood movies - the problem being that dubbed TV shows and dubbed movies are handled completely differently by completely different people. Dubbed movies with big Hollywood stars are generally using a rather small cast of high-profile voice actors, most of whom regularly dub several actors (the German voice of William Shatner is the same as that of Sean Connery, Bruce Willis is the same voice actor as Sylvester Stallone etc) - meaning that most voices in German dubbed movies tend to sound the same, which I find seriously grating (this is probably not that much of a problem if you only watch a movie or two, but after a lifetime of watching dubbed movies on TV, I just can't stand the standard voice actors' voices any more). In TV shows, voice actors are generally selected by their ability to match the original actor's voice which leads to a much more varied and satisfying listening experience. In addition to Dominus Vobisdu's excellent Star Trek recommendation, you might also have a look at the German edition of the Simpsons - the voice actors are brilliant, and the translators generally did an impressive job of translating all the puns and little jokes. As far as German movies go, the best ones I've seen recently were the films based on the &quot;Brenner&quot; novels by [[Wolf Haas]] (''Komm süßer Tod'', ''Silentium'' and ''Der Knochenmann'') and of course ''Indien'', starring [[Josef Hader]] who also plays police inspector Brenner in the Wolf Haas movies. All of these are in rather heavy Austrian dialect, so they might be a bit difficult to understand if you're just beginnging to watch German movies. If you like absurdist, slightly pythonesque humor, try some of the [[Helge Schneider]] movies and the old eponymous TV series by [[Vicco von Bülow|Loriot]] - the latter especially is a great way to pick up on your language skills as part of the series' humor is that most everyone is talking in an incredibly well-pronounced, exact and extremely grammatically correct tone -- [[User:Ferkelparade|Ferkelparade]] [[User_talk:Ferkelparade|&amp;pi;]] 22:03, 23 July 2012 (UTC)

2469 According to Hindi dubbing director of [[Main Frame Software Communications]] [[Eliza Lewis|Ellie Lewis]], Samay Thakkar has been voicing various characters in many Hollywood films in [[Hindi language|Hindi]]. 2494 '''''The Expendables''''' is an American [[Ensemble cast|ensemble]] [[action thriller]] [[media franchise|franchise]] conceived by [[David Callaham]], spanning a film series, the first three ones cowritten by [[Sylvester Stallone]], and additional media. The films star an ensemble cast, notably Stallone and [[Jason Statham]], and are produced by [[Avi Lerner]] and Kevin King-Templeton. The film series, an acknowledgement of former blockbuster action films made in the 1980s and 1990s, also pays homage to action stars of former decades, and the more recent stars in action. The series consists of the films ''[[The Expendables (2010 film)|The Expendables]]'' (2010), ''[[The Expendables 2]]'' (2012), ''[[The Expendables 3]]'' (2014), ''[[Expend4bles]]'' (2023), and an ongoing comic book series, ''[[The Expendables Go to Hell]]'' (2021). Though criticism with regard to plot and dialogue between characters has been expressed, critics praised the use of comic relief in between action.

2502 * ''[[The Expendables Go to Hell]]'': Conceptualized during the writing of the [[The Expendables 2|second film]], the series was written by Chuck Dixon, from the original story co-written by [[Sylvester Stallone]] and Dixon. Based on a concept that Stallone had written for a movie he knew would never be produced, together with writing contributions from Richard C. Meyer, the series centers around the supernatural war that the titular mercenaries face after being killed and their adventures in [[hell]]. Together the team works to thwart [[Satan|the devil]] and his army of villainous minions (including [[Adolf Hitler]], [[Sadam Hussein]], [[Joseph Stalin]], and [[Osama bin Ladin]], among others). Funded through an online campaign, the series is published by Splatto Comics.&lt;ref name=&quot;Hell_BD&quot;&gt;{{cite web|url=https://bloody-disgusting.com/comics/3603123/sylvester-stallone-came-story-upcoming-graphic-novel-expendables-go-hell/|work=Bloody Disgusting|title=Sylvester Stallone Came Up With the Story for Upcoming Graphic Novel 'The Expendables Go to Hell'!|author=Squires, John|date=February 3, 2018|access-date=October 7, 2021|archive-date=October 8, 2021|archive-url=https://web.archive.org/web/20211008054727/https://bloody-disgusting.com/comics/3603123/sylvester-stallone-came-story-upcoming-graphic-novel-expendables-go-hell/|url-status=live}}&lt;/ref&gt;&lt;ref name=&quot;Hell_DS&quot;&gt;{{cite web|url=https://www.digitalspy.com/movies/a30761388/expendables-cast-sylvester-stallone-graphic-novel/|work=Digital Spy|title=Sylvester Stallone teases &quot;next adventure&quot; of The Expendables|author=Seddon, Dan|date=April 20, 2020|access-date=November 11, 2021|archive-date=November 11, 2021|archive-url=https://web.archive.org/web/20211111154747/https://www.digitalspy.com/movies/a30761388/expendables-cast-sylvester-stallone-graphic-novel/|url-status=live}}&lt;/ref&gt;&lt;ref name=&quot;Hell_CB&quot;&gt;{{cite web|url=https://www.cinemablend.com/news/2489624/sylvester-stallone-is-bringing-the-expendables-back-and-sending-them-to-hell|work=Cinemablend|title=Sylvester Stallone Is Bringing The Expendables Back And Sending Them To Hell|author=Evans, Nick|date=February 4, 2020|access-date=November 11, 2021|archive-date=November 11, 2021|archive-url=https://web.archive.org/web/20211111155145/https://www.cinemablend.com/news/2489624/sylvester-stallone-is-bringing-the-expendables-back-and-sending-them-to-hell|url-status=live}}&lt;/ref&gt;&lt;ref name=&quot;Hell_CD&quot;&gt;{{cite AV media |url=https://www.youtube.com/watch?v=1AwV6XQW8VA|work=YouTube|title=The Expendables Go To Hell' |last=Dixon |first=Chuck|date=February 5, 2020|access-date=November 11, 2021}}&lt;/ref&gt;

2508 '''''The Expendables 3''''' is a 2014 American [[action film]] directed by [[Patrick Hughes (filmmaker)|Patrick Hughes]] and written by Creighton Rothenberger, Katrin Benedikt and [[Sylvester Stallone]]. It is the third installment in [[The Expendables (franchise)|''The Expendables'' franchise]] and the sequel to ''[[The Expendables (2010 film)|The Expendables]]'' (2010) and ''[[The Expendables 2]]'' (2012). The film features an [[ensemble cast]] of largely action film actors consisting of [[Jason Statham]], [[Sylvester Stallone]], [[Antonio Banderas]], [[Jet Li]], [[Wesley Snipes]], [[Dolph Lundgren]], [[Kelsey Grammer]], [[Randy Couture]], [[Terry Crews]], [[Kellan Lutz]], [[Ronda Rousey]], [[Glen Powell]], [[Victor Ortiz]], [[Mel Gibson]], [[Harrison Ford]], and [[Arnold Schwarzenegger]].

2510 In March 2012, cast member [[Randy Couture]] said a third installment of ''[[The Expendables (film series)|The Expendables]]'' might begin production in late 2012 after the release of ''[[The Expendables 2]]''.&lt;ref name=&quot;Sequel1&quot; /&gt; In April 2012, [[Steven Seagal]] said he was offered a role in a third film.&lt;ref name=&quot;Sequel2&quot; /&gt; In August 2012, producer [[Avi Lerner]] confirmed that [[Nicolas Cage]] had been signed for the then-potential sequel. He also said that the producers intended to bring back the series' stars, attempting to have [[Mickey Rourke]] reprise his role, and had approached [[Clint Eastwood]], [[Harrison Ford]], and  [[Wesley Snipes]] to play new roles.&lt;ref name=&quot;Sequel3&quot; /&gt; [[Sylvester Stallone]] said &quot;We are thinking about different concepts-the third one is the hardest. The second is the natural progression. The third, that's when the air gets rare. We're thinking ambitiously about it, you now have to give audiences something they don't expect at all, Maybe, even going into a different genre&quot;.&lt;ref name=&quot;SequelAug15&quot; /&gt; Also in August, [[Chuck Norris]] said he would not return for a sequel.&lt;ref name=&quot;SequelNorris&quot; /&gt; On August 13, 2012, [[Jean-Claude Van Damme]] indicated that Stallone might include him in ''The Expendables 3'' as Claude Vilain, brother of Jean Vilain.&lt;ref name=&quot;SequelVanDamme&quot; /&gt; On October 31, 2012, it was confirmed that [[Nu Image]] and [[Millennium Films]] were in the process of pre-selling international distribution rights for ''The Expendables 3''.&lt;ref name=&quot;2012OctSequel&quot; /&gt; On December 19, 2012, it was reported that [[Jackie Chan]] had agreed to join the sequel on the condition that he would have more than a minor role.&lt;ref name=&quot;SequelChan&quot; /&gt; Chan later dropped out of the project due to scheduling conflicts.&lt;ref&gt;{{cite web|url=https://www.youtube.com/watch?v=0jewyFy3174|title=Expendables 3 - full press conference Mel Gibson Sylvester Stallone Jason Statham|last=moviemaniacsDE|date=August 13, 2014|via=YouTube|access-date=November 5, 2014|archive-date=April 25, 2017|archive-url=https://web.archive.org/web/20170425173626/https://www.youtube.com/watch?v=0jewyFy3174|url-status=live}}&lt;/ref&gt;
2511 On December 19, 2013, the first [[Trailer (promotion)|teaser trailer]] got released with the intent of showcasing the large cast of the movie.&lt;ref name=&quot;TeaserTrailer&quot; /&gt; At 2014 [[CinemaCon]], the official poster of the film was shown for the first time, although it only slightly differs from material shown before, featuring a white background instead of a black one.&lt;ref name=&quot;CinemaCon&quot; /&gt; The marketing scheme of putting a huge emphasis on the film's [[ensemble cast]] of famous action actors was continued in early April when 16 character posters of the film's cast were released and divided over four websites for maximum exposure.&lt;ref name=&quot;CharacterPosters&quot; /&gt; One day later, the first trailer with actual footage from the film premiered, again highlighting the film's huge cast, being referred to as a &quot;[[wikt:roll call|roll call]] trailer&quot; by [[Lionsgate]].&lt;ref name=&quot;Trailer1&quot; /&gt; At the 2014 Cannes Film Festival, [[Millennium Films]] hosted a special event promoting the film at the [[InterContinental Carlton Cannes Hotel|Carlton Hotel]] with [[Sylvester Stallone]], [[Jason Statham]], [[Arnold Schwarzenegger]], [[Mel Gibson]], [[Harrison Ford]], [[Wesley Snipes]], [[Antonio Banderas]], [[Dolph Lundgren]], [[Kelsey Grammer]], [[Randy Couture]], [[Kellan Lutz]], [[Victor Ortiz]], [[Glen Powell]] and director [[Patrick Hughes (director)|Patrick Hughes]] attending. The event lasted the entire day and featured the cast driving down the [[Croisette]] in tanks.&lt;ref name=&quot;Cannes&quot; /&gt;
2512 Unlike the first two films in the ''Expendables'' franchise, this film received a PG-13 rating instead of an R rating, which received backlash from the fans. At the [[2014 Cannes Film Festival]], [[Sylvester Stallone]] announced that he was aiming for a [[PG-13 (Motion Picture Association)|PG-13]] rating for the film. Stating that albeit it was close to being rated R, he wanted to reach a younger and broader audience with the new film.&lt;ref name=&quot;PG-13&quot; /&gt; However, when Stallone first submitted the film to the [[Motion Picture Association of America|MPAA]], they assigned it with the usual R rating and had to be trimmed down to be rated PG-13. On July 1, the MPAA granted ''The Expendables 3'' a PG-13 rating; the given description being &quot;violence including intense sustained gun battles and fight scenes and for language.&quot;
2513 Since its release, Stallone regrets the PG-13 rating, saying that it was &quot;a horrible miscalculation on everyone's part in trying to reach a wider audience but in doing such, diminish the violence that the audience expects. I'm quite certain it won't happen again.&quot;&lt;ref&gt;{{cite web |url=http://www.craveonline.com/film/interviews/792031-interview-sylvester-stallone-promises-r-rated-expendables-4 |title=Interview: Sylvester Stallone Promises R-Rated 'Expendables 4' |website=[[CraveOnline]] |date=November 23, 2014 |first=Fred |last=Topel |access-date=January 10, 2015 |archive-url=https://web.archive.org/web/20150219054148/http://www.craveonline.com/film/interviews/792031-interview-sylvester-stallone-promises-r-rated-expendables-4 |archive-date=February 19, 2015 |url-status=dead}}&lt;/ref&gt;
2514 One possible reason for this loss in ticket sales is because the film leaked three weeks ahead of its release; however, since most downloads were outside the United States, if every downloading American paid to see the movie, it would have made only $4 million more.&lt;ref&gt;{{cite news|url=https://www.nytimes.com/2014/08/18/movies/the-expendables-3-fumbles-its-mission.html|title='The Expendables 3' Fumbles Its Mission|first=Brooks|last=Barnes|newspaper=The New York Times|date=August 17, 2014|access-date=March 3, 2017|archive-date=December 6, 2017|archive-url=https://web.archive.org/web/20171206212051/https://www.nytimes.com/2014/08/18/movies/the-expendables-3-fumbles-its-mission.html|url-status=live}}&lt;/ref&gt; Another possible reason was the PG-13 cut which was meant to attract younger audiences. Only 34% of viewers were under 25 years old while the less violent cut may have reduced interest from older audiences.&lt;ref name=&quot;ForbesMendelson&quot; /&gt; [[Sylvester Stallone]] later admitted that toning the film down for a PG-13 rating was a mistake.&lt;ref&gt;{{cite web|url=https://www.cinemablend.com/new/Sylvester-Stallone-Finally-Admits-Expendables-Made-Huge-Mistake-68375.html|title=Sylvester Stallone Finally Admits The Expendables Made This Huge Mistake|date=November 24, 2014|access-date=April 17, 2020|archive-date=May 24, 2020|archive-url=https://web.archive.org/web/20200524095457/https://www.cinemablend.com/new/Sylvester-Stallone-Finally-Admits-Expendables-Made-Huge-Mistake-68375.html|url-status=live}}&lt;/ref&gt;

2527 :'''Easy verification:''' The hook can be verified from this line in the Development section: {{xt|The publisher said the purchase was fueled by the success of the 2008 Rambo film and by the scheduled release of the action film Expendables 2, starring Sylvester Stallone.}}
2528 :::*[[File:Symbol question.svg|16px]] Close paraphrasing issue has been successfully resolved, refs have been fixed, and release information has been clarified in a reasonable fashion, even if an actual release date does not seem to be currently available. The only thing I can see is missing is an inline source that carries the explicit information that ''The Expendables 2'' does indeed star Sylvester Stallone. The source given mentions the movie, but not specifically that it's a Stallone vehicle, just that it's an action movie. An extra citation tying Stallone to Expendables 2 should be easy enough to find, and in this case it is needed. Once you have that, this should be ready to go again. -[[User:BlueMoonset|BlueMoonset]] ([[User talk:BlueMoonset|talk]]) 05:18, 22 December 2012 (UTC)

2544 In March 2019, The Boies/Schiller Film Group filed suit on Tuesday, accusing Emmett/Furla Oasis Films of breaching a deal to produce  ''Escape Plan'' sequels starring [[Sylvester Stallone]]. According to the suit, Boies/Schiller put up a $6 million loan for the $65 million project. The arrangement also gave Boies/Schiller rights to finance and produce the sequels, ''[[Escape Plan 2: Hades]]'' and ''[[Escape Plan: The Extractors]]''. Boies/Schiller alleges that Emmett/Furla Oasis Films breached that agreement, and did not allow Boies/Schiller to put up financing for the sequels. 2573 After signing with Scotti Brothers and moving to Los Angeles in 1985, Tepper found himself in the public eye after actor/director [[Sylvester Stallone]] used Tepper's song &quot;No Easy Way Out&quot; in the movie ''[[Rocky IV]]''.&lt;ref name=&quot;allmusic1&quot;&gt;{{cite web|last=Demalon |first=Tom |url=http://www.allmusic.com/artist/robert-tepper-mn0000291687 |title=Robert Tepper - Music Biography, Credits and Discography |publisher=AllMusic |access-date=2013-06-14}}&lt;/ref&gt; The track climbed to No. 22 on Billboard's Hot 100 in 1986, and Tepper's debut album of the [[No Easy Way Out (album)|same name]] peaked at No. 144.&lt;ref&gt;{{cite web|author=Robert Tepper |url=http://www.allmusic.com/artist/robert-tepper-mn0000291687/awards |title=Robert Tepper - Awards | publisher=AllMusic |access-date=2013-06-14}}&lt;/ref&gt; However, the 1988 follow-up album ''Modern Madness'' was a commercial failure. Both ''No Easy Way Out'' and ''Modern Madness'' received little promotion from the label [[Scotti Bros. Records]]. As a result, Tepper separated from the label in protracted legal proceedings and was unable to record any new material although he would continue to write. A third album ''No Rest for the Wounded Heart'' would follow eight years later in 1996.&lt;ref name=&quot;allmusic1&quot;/&gt;

2658 Does anyone know of a web-site (or some other source) that collectively lists salaries for various actors and celebrities in various films, TV shows, theatre roles, etc.? I know that this information can be found piece-meal here and there. I am wondering if there is some sort of collective list of information, all found in one place. For example, it would state: Alan Alda was paid $3 million per episode on the TV show ''M*A*S*H''; Sylvester Stallone was paid $28 million for his role in the film ''Rocky''; Nathan Lane was paid $11 million for his role on Broadway in ''The Producers''.   Stuff like that.   Thanks.   [[User:Joseph A. Spadaro|Joseph A. Spadaro]] ([[User talk:Joseph A. Spadaro|talk]]) 18:21, 14 June 2014 (UTC)

It is the sequel to ''[[Guardians of the Galaxy (film)|Guardians of the Galaxy]]'' (2014) and [[List of Marvel Cinematic Universe films|the 15th film]] in the [[Marvel Cinematic Universe]] (MCU). Written and directed by [[James Gunn]], the film stars an [[ensemble cast]] featuring [[Chris Pratt]], [[Zoe Saldaña]], [[Dave Bautista]], [[Vin Diesel]], [[Bradley Cooper]], [[Michael Rooker]], [[Karen Gillan]], [[Pom Klementieff]], [[Sylvester Stallone]], and [[Kurt Russell]]. In the film, the [[Guardians of the Galaxy (Marvel Cinematic Universe)|Guardians]] travel throughout the cosmos as they help [[Peter Quill (Marvel Cinematic Universe)|Peter Quill]] (Pratt) learn more about his mysterious parentage.

2680 In May 2010, Stallone revealed he was &quot;done&quot; with the character, stating, &quot;I think Rambo's pretty well done. I don't think there'll be any more. I'm about 99% sure I was going to do it ... but I feel that with Rocky Balboa, that character came complete circle. He went home. The portrayal of the Rambo character was put under scrutiny. Writing for the ''Los Angeles Times'', [[Kenneth Turan]] gave the film 3 out of 4 stars and was complimentary of the story's &quot;surprisingly brooding examination&quot; of Rambo: &quot;Sure, Rambo is convincing when he ends up telling bad people, 'I'm gonna hurt you real bad', but there is also a kind of fragility that makes us worry about people putting the hurt on him.&quot;&lt;ref name=&quot;turan&quot;&gt;{{cite web|last=Turan|first=Kenneth|title=Review: Sylvester Stallone's 'Rambo: Last Blood' goes for the jugular - but in darker ways|url=https://www.latimes.com/entertainment-arts/movies/story/2019-09-19/rambo-last-blood-review-sylvester-stallone|website=Los Angeles Times|date=September 19, 2019|access-date=September 20, 2019}}&lt;/ref&gt; Peter Debruge wrote a negative review for ''[[Variety (magazine)|Variety]]'': &quot;This character is a mess of contradictions, representing, on one hand, the permanent damage that military service can do to one's soul while simultaneously suggesting what the ideal soldier looks like.&quot;&lt;ref name=&quot;debruge&quot;&gt;{{cite web|last=Debruge|first=Peter |title=Film Review: 'Rambo: Last Blood'|url=https://variety.com/2019/film/reviews/rambo-last-blood-review-sylvester-stallone-1203341831/ |website=Variety |date=September 19, 2019 |access-date=September 19, 2019}}&lt;/ref&gt; Rating the film 4.5 out of 10 for [[IGN]], Witney Seibold lamented, &quot;A character who was originally meant to stand as a symbol for the damage that war can do to a soldier is now best remembered as an unkillable human machine gun&quot;, but credited Stallone with &quot;[managing] to give as soulful a performance as the part warrants&quot;.&lt;ref name=&quot;seibold&quot;&gt;{{cite web|last=Seibold|first=Witney |title=Rambo: Last Blood Review|url=https://www.ign.com/articles/2019/09/18/rambo-last-blood-review |website=[[IGN]] |date=September 19, 2019 |access-date=September 19, 2019}}&lt;/ref&gt;

2760 Barney Ross, portrayed by [[Sylvester Stallone]], is the leader of the Expendables. He is hired by Agent Church in the first film to investigate suspicious activities on the island of Vilena and take out its fanatical dictator, General Garza. Barney considers abandoning the job after finding out that renegade CIA agent James Munroe is using Vilena as a source of narcotics production. However, he is impressed by the courage of Garza's rebellious daughter and ends up taking down both Garza and Munroe. Though Barney completes his assignment, Church wants compensation for the death of Munroe and hires the Expendables in [[The Expendables 2|the second film]] to recover a briefcase containing sensitive information from a downed plane in Albania . Since the case is locked in a booby-trapped safe, Church forces Barney to take hacker Maggie Chan along for the mission. Barney reluctantly accepts and the mission goes off without a hitch. However, Barney's crew is ambushed by arms-dealer Jean Vilain and his gang, the Sangs. Vilain murders Barney's rookie crew member Billy the Kid and takes the briefcase, which contains a computer map revealing the location of five tons of discarded plutonium. Vowing vengeance, Barney and the crew hunt down Vilain. After a one-on-one battle at an airport, Barney kills Vilain.
2761 The film moved swiftly into production, within a week of Amir Shervan and ex-[[Sylvester Stallone]] bodyguard&lt;ref&gt;[https://drafthouse.com/event/psycho-cinema-samurai-cop Alamo Dafthouse Cinema]&lt;/ref&gt; Matt Hannon's first meeting. Upon walking into Shervan's office for the first time, Matt Hannon was told that he was perfect and was immediately handed the full script to the film. Despite the film being titled ''Samurai Cop'', Hannon had no experience with weapons training, and all of his formal practice would be classified as [[mixed martial arts|MMA]]. As a result of Hannon's lack of experience and Shervan's inability to direct, all of the combat scenes were choreographed by martial arts expert Gerald Okamura, or were planned out by the actors themselves, sometimes only fifteen minutes before the scene in question was filmed.

2764 In March 2019, The Boies/Schiller Film Group filed suit on Tuesday, accusing Emmett/Furla Oasis Films of breaching a deal to produce two ''Escape Plan'' sequels starring Sylvester Stallone. According to the suit, Boies/Schiller put up a $6 million loan for the $65 million project. The arrangement also gave Boies/Schiller rights to finance and produce the sequels, ''Escape Plan 2: Hades'' and ''Escape Plan: The Extractors''. Boies/Schiller alleges that Emmett/Furla Oasis Films breached that agreement, and did not allow Boies/Schiller to put up financing for the sequels. He followed me here because he monitored all these things I posted on message boards about i.e. my former support workers, my beef with [[The Internet Movie Database]], over their moderators removing verifiable film credits on the page for Sylvester Stallone, and me using forums to discuss the ''[[Resident Evil]]'' games, which is why he mass registered at a forum I go on that doesn't have any moderators. Everybody there is getting sick of his spam, but he just jumps proxies and registers again anyway. He also sent people to my friend's house a few weeks ago, after he posted fake ads on a site we couldn't trace. Someone on a forum advised me to 100% ignore him and not mention him or react at all any more, as talking about him is giving him energy to keep doing this.[[User:PeterMan844|PeterMan844]] ([[User talk:PeterMan844|talk]]) 22:35, 5 September 2017 (UTC)

2806 Later retrospective reviews has been mostly negative from audiences and critics, citing its poor writing and dialogue, acting, and its effects. Some gave the benefit of the doubt because it was purposefully a student film, but some state their gripes about its late release for just capitalizing into Daisy Ridley's fame, similar to [[Sylvester Stallone]] for ''[[The Party at Kitty and Stud's]]'' when ''[[Rocky]]'' was a big hit at the time. Ridley was also viewed for her lackluster performance, but was also the only favorable part of the film. [[IGN]]'s Tom Jorgensen gave it a 2 stars out of 10, stating that &quot;its story is incomprehensible, it isn't scary at all, and the acting is wall-to-wall bad&quot; and cites that the film &quot;is damn near unwatchable.&quot;&lt;ref&gt;{{Cite web |url=https://www.ign.com/articles/2019/06/27/scrawl-review-daisy-ridley-movie|title=Scrawl Review |work=[[IGN]] }}&lt;/ref&gt;

2814 '''''Chuck''''' (released as '''''The Bleeder''''' in the UK and Ireland) is a 2016 American [[Biographical film|biographical]] [[Sports film|sports]] [[drama]] film directed by [[Philippe Falardeau]] and written by [[Jeff Feuerzeig]], [[Jerry Stahl]], [[Michael Cristofer]] and [[Liev Schreiber]], who also stars in the title role. The cast includes [[Elisabeth Moss]], [[Ron Perlman]], [[Naomi Watts]], [[Jim Gaffigan]], [[Michael Rapaport]], [[Pooch Hall]], [[Morgan Spector]], [[Jason Jones (actor)|Jason Jones]] and [[Catherine Corcoran]]. The film depicts the life of heavyweight boxer [[Chuck Wepner]] and his [[Muhammad Ali vs. Chuck Wepner|1975 title fight]] with the heavyweight champion, [[Muhammad Ali]], which inspired [[Sylvester Stallone]]'s character and screenplay for the 1976 film ''[[Rocky]]''.

2815 Although the fight is largely one-sided, Chuck defies predictions of being knocked out in the third round, almost going the full distance against the champion and even knocking him down. Despite the loss, Wepner becomes a local hero. Though he is irritated to hear claims from Ali that Wepner's knockdown of him was due to a foot stomp, Chuck enjoys his newfound celebrity and becomes the basis of [[Sylvester Stallone]]'s film [[Rocky]]. However, Chuck becomes increasingly addicted to his fame and begins taking cocaine. He subsequently becomes infatuated with female bartender Linda. Phyllis soon catches on to Wepner's unfaithful behavior and kicks him out of the house.

2817 On October 30, 2015, additional cast was announced, including [[Jim Gaffigan]] as John Stoehr, Wepner's loyal friend; [[Michael Rapaport]] as Wepner's estranged brother; [[Pooch Hall]] as boxer Ali, whose 1975 fight with Wepner led to Wepner's sudden fame; and [[Morgan Spector]] as actor-screenwriter [[Sylvester Stallone]], who wrote ''[[Rocky]]'' soon after the 1975 fight. 2823 In 1998, Adonis &quot;Donnie&quot; Johnson is spending time at a juvenile detention center in [[Los Angeles]] and frequently getting into fights with other children. As a result, he is sent to solitary confinement. Mary Anne Creed ([[Phylicia Rashad]]), Apollo's widow, meets with Adonis and adopts him; informing him that he is [[Apollo Creed]]'s son (sired from an extramarital affair). Seventeen years later, in 2015, Adonis (using his biological mother's last name Johnson) is a wealthy young college graduate working at a securities firm at the Smith Boardley Financial Group. However, on weekends, he sneaks out to [[Tijuana]] to fight professional boxing matches against unheralded opponents and maintains an undefeated 15-0 record. Soon, Adonis resigns from his securities firm job to pursue his dream of becoming a boxer. Mary Anne vehemently opposes Adonis's plot of becoming a boxer, remembering how her husband was killed in the ring during a match against [[Ivan Drago]] [[Rocky IV|thirty years ago]] and how [[Rocky Balboa]] was forced into retirement after suffering [[cavum septum pellucidum|brain damage]]. Adonis finds it hard to get anyone in Los Angeles to train him due to his father's death in the ring, particularly after he suffers an embarrassing loss in a sparring match to light heavyweight contender Danny &quot;Stuntman&quot; Wheeler ([[Andre Ward]]). Undaunted, Adonis moves out of his mother's residence and travels to Philadelphia in hopes of seeking out his father's best friend and former rival, Rocky ([[Sylvester Stallone]]).

2824 And so when he got sick he was losing his strength because he had a muscular condition. He was having trouble getting around, having trouble carrying stuff. I started thinking about this idea of my dad's mortality. For me he was kind of like this mythical figure, my father, similar to what Rocky was for him. Going through it inspired me to make a film that told a story about his hero going through something similar to kind of motivate him and cheer him up. That's how I came up with the idea for this movie.&quot;&lt;ref&gt;{{cite web|title=Creed Director Ryan Coogler on His Chemistry With Michael B. 2825 Adonis is torn between trying to preserve his father's legacy and build his own. [[A.O. Scott]] of ''[[The New York Times]]'' wrote that, &quot;Adonis is a complex character with a complex fate. He is at once a rich kid and a street kid, the proud carrier of an illustrious heritage and an invisible man. His relationship with Rocky is complicated, too. '''Robert &quot;Rocky&quot; Balboa''' (also known by his ring name '''The Italian Stallion''', played by [[Sylvester Stallone]]), is the title character and main protagonist of the ''Rocky'' film series. The character was created by Sylvester Stallone, who has also portrayed him in all eight films in the franchise. He is depicted as an [[everyman]] who started out by going the distance and overcoming obstacles that had occurred in his life and career as a professional boxer. In the ''Creed'' films, he trains [[Apollo Creed]]'s illegitimate son Adonis to win the world heavyweight championship.

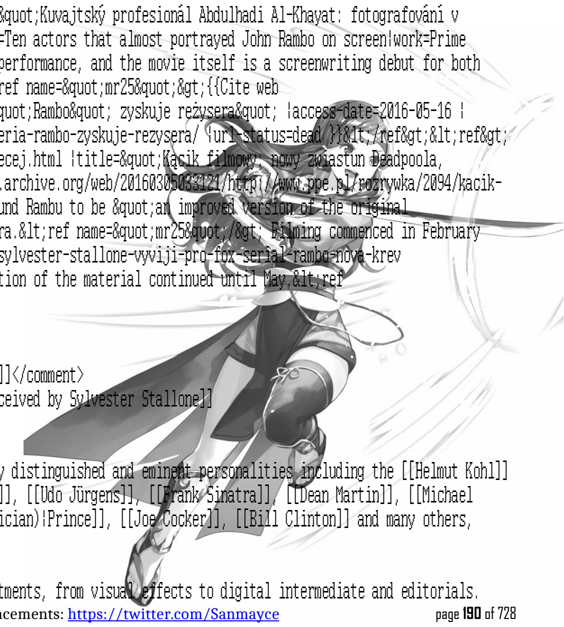
2916 From 2004 to 2009, Bagdasarian worked on over a hundred feature films, in a variety of film production and post-production departments, from visual effects to digital intermediate and editorials.



```
Bagdasarian was credited on such films as [[Sylvester Stallone]]'s &quot;[[Rambo (2008 film)|Rambo]]&quot; and [[Werner Herzog]]'s &quot;[[Bad Lieutenant: Port of Call New Orleans|Bad Lieutenant]].&quot;
2917 Scenes in several other movies, including ''[[Rocky II]]'' (1979) starring [[Sylvester Stallone]], ''[[Mannequin (1987 film)|Mannequin]]'' (1987) starring [[Andrew McCarthy]] and [[Kim Cattrall]], ''[[In Her Shoes (film)|In Her Shoes]]'' (2005) starring [[Cameron Diaz]], [[Shirley MacLaine]], and [[Toni Collette]], and ''[[The Happening (2008 film)|The Happening]]'' (2008) starring [[Mark Wahlberg]], were filmed a few streets away in nearby Rittenhouse Square. The exceptional use of this one city block by the movie and television industry relates to the history and aesthetics of Delancey Place, and cultural setting as an idyllic city street. For example, in ''[[Trading Places]]'', it was used to convey the great wealth of the main character while in ''[[The Answer Man]],'' the aesthetic of the street was used in a strolling scene,&lt;ref&gt;Paetzold, Heinz (2013). The aesthetics of city strolling. Contemporary Aesthetics vol. 11, p.10.&lt;/ref&gt; where the two main characters were interacting.

2922 Throughout most of the 1980s and 90s, Rothe had about ten large shows each year in different US cities, and Peter regularly showed her work at the [[Art Basel|Basel Art Fair]]. Every month or two, she created a new edition for galleries to buy. She made all of her work with the help of one assistant. Rothe also did paintings for private commissions, but she rarely kept track of these sales. [[Sylvester Stallone]] and [[Clint Eastwood]], who were her neighbors in Carmel, both own some of her paintings. She painted a large outdoor mural in the Hog's Breath Inn, Clint Eastwood's former restaurant in Carmel.

2941 '''''Ultimate Beastmaster''''' is an American [[Reality television|reality]] [[sports entertainment]] competition that premiered on [[Netflix]] on February 24, 2017. The show differentiates itself from other [[obstacle course]] competition shows by showcasing not only international talent, but by producing six localized versions, featuring select television hosts, actors, comedians and athletes as commentators from the six countries competing in the show. Reactions from all countries' hosts appear in each localized versions, especially during course clearing victories. Each season consists of 10 episodes, released simultaneously on Netflix worldwide.&lt;ref&gt;{{cite web|url=https://variety.com/2016/digital/news/ultimate-beastmaster-netflix-competition-series-sylvester-stallone-dave-broome-1201769095/|title=Netflix Orders Global Competition Series 'Ultimate Beastmaster' from Sylvester Stallone, Dave Broome|last=Prudon|first=Laura|website=Variety|date=May 9, 2016|access-date=October 5, 2016|archive-date=November 8, 2020|archive-url=https://web.archive.org/web/20201108100911/https://variety.com/2016/digital/news/ultimate-beastmaster-netflix-competition-series-sylvester-stallone-dave-broome-1201769095/|url-status=live}}&lt;/ref&gt; The first season premiered on February 24, 2017, while the second season aired on Netflix on December 15, 2017.

2942 In each episode, there are twelve contestants (two from each country) who run a new obstacle course known as "The Beast". The winner is crowned "Beastmaster". 2944 Before the fight, Wepner was lying in bed with his wife when he told her something like &quot;Even if I don't win, I just want to prove I belong there.&quot; Wepner later shared this line with [[Sylvester Stallone]] who used it in ''[[Rocky]]''.&lt;ref name = &quot;Facing Ali 221&quot;&gt;{{cite book|title=Facing Ali|author=Stephen Brunt |publisher=The Lyons Press|page = 221|year=2002}}&lt;/ref&gt; On the day of the fight Wepner presented a &quot;very sexy&quot; blue negligee to his wife and told her to wear it that night in bed since she would be sleeping with the heavyweight champion of the world. 2945 The fight was sufficiently inspiring for Sylvester Stallone (who watched the fight live) to partly base the character of [[Rocky Balboa]] on Wepner, and of [[Apollo Creed]] on Ali. Stallone would later rush home after the fight and in less than four days of near constant writing, had completed his screenplay about an underdog fighter who gets a shot at the heavyweight title. The screenplay, titled ''Rocky,'' would be purchased by [[United Artists]], with the agreement that Stallone would also star in the film. Released the following year, ''Rocky'' would go on to win three [[Academy Awards|Oscars]] (including [[Academy Award for Best Picture|Best Picture]]) and became the highest-grossing film of [[1976 in film|1976]].

2998 The American judiciary has followed both these tests. There have also been a number of instances where the Court has used both the tests in its analysis. For instance, in ''[[Anderson v. Stallone|Anderson v Stallone]]'',&lt;ref&gt;11 USPQ2D 1161 (C.D. Cal. 1989).&lt;/ref&gt; it was held that the character [[Rocky Balboa|Rocky]] played by movie star [[Sylvester Stallone]] in the eponymous movie franchise had come to be identified with certain physical traits and mannerisms that qualified as a well delineated character. Further, this 'highly developed' character was held to constitute the story being told. Similarly, the character of [[James Bond (literary character)|James Bond]] was awarded copyright protection on the grounds of being both sufficiently delineated as well as central to the story being told.&lt;ref&gt;''Metro-Goldwyn-Mayer v. American Honda'', 900 F. Supp. 1287 (C.D. Cal. 1995).&lt;/ref&gt; The fact that the character had been played by multiple actors was not held to be relevant since the characteristics associated with Bond had remained consistent across sixteen films.

2999 In 2017 the Stallone Sisters, Sistine, Sophia, and Scarlet, the three daughters of movie star [[Sylvester Stallone]], were featured in the #MeetTheStallones campaign promoting a new capsule collection for TDE.&lt;ref&gt;{{cite web|url=http://www.vogue.com.au/fashion/news/the+daily+edited+stallone+sisters+new+campaign,42526/|title=The Stallone sisters are the new faces of The Daily Edited|date=18 April 2017|publisher=}}&lt;/ref&gt;&lt;ref&gt;{{cite web|url=http://www.vanityfair.com/style/2017/04/sylvester-stallone-daughters-fashion-campaign/|title=Sylvester Stallone Calls His Daughters' New Fashion Campaign &quot;Volcanic&quot;|first=Erika|last=Harwood|website=[[Vanity Fair (magazine)|Vanity Fair]] |date=18 April 2017 |publisher=}}&lt;/ref&gt;

3068 Known as &quot;The Legendary South Beach Gatekeeper&quot;.[1], Cedric Adegnika (born August 3, 1973) moved from France to the US in 1995. He worked at the most prestigious venues in the country such as Bar None (owned by Sylvester Stallone), The Living Room, Man Ray, Mynt, Set, LIV and Story [2]. Throughout his career he denied access to celebrities such as Dennis Rodman [3], Wilmer Valderrama, Jamie Foxx (with whom he later became friend)&amp; Robert De Niro establishing a reputation for himself. With a resume that includes events during the Cannes Film Festival &amp; Paris Fashion Week, and two years at the A-list restaurant-lounge Man Ray in Chelsea New York City (owned by Johnny Depp, Sean Penn, John Malkovich, and Harvey Weinstein) [4]. It was here, eighteen years after moving to Miami and living the South Beach lifestyle, that he realized his influence. In 2013 he left his velvet rope days far behind and opened THE FLAT, a cocktail lounge which quickly became a hotspot [5], and despite his success Adegnika sold it to move to Panama City Panama where he opened LESSEP'S bistro cafe [6]

3072 Noël Carroll references Mulvey's pivotal paper on psychoanalysis and visual pleasure in his writing, and plays devil's advocate to her claim that women are the only subjects of gaze. Carroll acknowledges and agrees with Mulvey's assessment that women in film are strategically placed for the male gaze despite the role of their actual character. Carroll states, &quot;Women in Hollywood film are staged and blocked for male erotic contemplation and pleasure.&quot;&lt;ref name=&quot;:10&quot;&gt;{{cite journal |jstor=431572|title=The Image of Women in Film: A Defense of a Paradigm|journal=The Journal of Aesthetics and Art Criticism|volume=48|issue=4|pages=349-360|last1=Carroll|first1=Noël|year=1990|doi=10.2307/431572}}&lt;/ref&gt; However, Carroll adds that men in films are also strategically placed for the purpose of pleasure. He cites such examples as [[Sylvester Stallone]] and [[Arnold Schwarzenegger]], big bodybuilding actors &quot;whose scenes are blocked and staged precisely to afford spectacles of bulging pectorals and other parts.&quot;&lt;ref name=&quot;:10&quot; /&gt; Similarly to actresses, male actors are also heralded for their facial attractiveness and are sometimes lauded exclusively for being attractive. As an example, Carroll offers [[Leslie Howard]], a male actor who appeared in ''[[Of Human Bondage (1934 film)|Of Human Bondage]]'' and ''[[Gone with the Wind (film)|Gone With the Wind]],'' who was highly successful in the industry despite being &quot;staggeringly ineffectual.&quot;&lt;ref name=&quot;:10&quot; /&gt; According to Carroll, being subject to the erotic gaze of the audience is not an exclusively female burden; rather, both sexes fall prey to Hollywood camera angles that best show off their bodies.

3096 Later in his career, Barker focused much more on studies of media audiences, drawing upon his background in [[cultural studies]]. His co-authored study of audiences of the [[Sylvester Stallone]] film, ''[[Judge Dredd (film)¦Judge Dredd]]'', was influential in the field of audience studies. In response to the censorship campaign against [[David Cronenberg]]'s ''[[Crash (1996 film)¦Crash]]'', again by the [[Daily Mail]], Barker, along with Jane Arthurs and Ramiswami Harindranath, oversaw and authored a study on the film's reception in the press and conducted an audience study. This was published as ''The Crash Controversy: Censorship Campaigns and Film Reception'' by Wallflower Press in 2001. Over the course of these and other audience studies, Barker developed a methodology for studying audiences which to date remains very influential in the field.

3101 After suffering a brain injury from a [[bank heist]] gone wrong, MacDonald (Matthew Modine) develops [[amnesia]] and is put into a prison psychiatric ward. Following his seventh year in evaluation, he is coerced by an inmate and a ward doctor (Ryan Guzman and Meadow Williams) to break out of prison and injected with a serum that forces him to relive the life he's forgotten. MacDonald must now elude a local detective (Sylvester Stallone), a toughened FBI agent (Christopher McDonald) and the drug's dangerous side effects in order to recover the stolen money all while confronting his past.

3104 Miller described the project as a [[whodunit]]-styled crime mystery. The filmmaker described his experiences with the cast with high praise, noting his life-long fandom of Sylvester Stallone. Miller stated that Stallone's experiences in filmmaking enhanced the film, classifying Stallone as an [[auteur]]. The filmmaker additionally that though the final act is a plot-twist, clues and hints are scattered throughout the movie, intended for repeated viewings from the audience. The script underwent several rewrites, prior to production, with major plot changes; while McDonald, Guzman, and Egglesfield joined production immediately after receiving word that Stallone had signed on to co-star in the film.&lt;ref name=&quot;Backtrace_Storyocity&quot;&gt;{{cite web¦url=https://www.storyocity.co/blog/2018/12/17/story-behind-the-story-backtrace¦work=Storyocity¦title=Story Behind the Story: Backtrace¦author=Storyocity¦date=December 20, 2018¦accessdate=November 23, 2021}}&lt;/ref&gt;

Wepner, a journeyman known as &quot;The Bayonne Bleeder&quot;, stunned Ali with a &quot;knockdown&quot; in the ninth round; Ali would later say he tripped on Wepner's foot, or that Wepner had actually stepped on Ali's foot and he lost his balance. 3116 The fight took place on October 2, 1980, in Las Vegas Valley, with Holmes easily dominating Ali, who was weakened from thyroid medication he had taken to lose weight. Giachetti called the fight &quot;awful ... the worst sports event I ever had to cover.&quot; Actor [[Sylvester Stallone]] was at ringside and said that it was like watching an autopsy on a man who is still alive.&lt;ref name=&quot;Hauser 2004&quot;/&gt; In the eleventh round, Angelo Dundee told the referee to stop the fight, making it the only time that Ali ever lost by [[technical knockout|stoppage]]. After the fight, Holmes went back to his dressing room and cried. The Holmes fight is said to have contributed to Ali's Parkinson's syndrome.&lt;ref&gt;{{cite news | url=https://www.nytimes.com/2009/10/27/arts/television/27muhammad.html | work=The New York Times | title=Boxing King Casts His Shadow, Even at Time of Defeat | date=October 26, 2009 | access-date=March 5, 2012 | first1=Mike | last1=Hale | archive-date=March 10, 2012 | archive-url=https://web.archive.org/web/20120310053609/http://www.nytimes.com/2009/10/27/arts/television/27muhammad.html? | url-status=live }}&lt;/ref&gt; Despite pleas to definitively retire, Ali fought one last time on December 11, 1981, in Nassau, [[Bahamas]], against [[Trevor Berbick]], losing a ten-round decision.&lt;ref&gt;{{cite news |title=Ali to try again? |url=https://news.google.com/newspapers?nid=1870&amp;dat=19810816&amp;id=9_EwAAAAIBAJ&amp;pg=2603,113296&amp;hl=en |newspaper=The Daytona Beach Sunday News-Journal |agency=Associated Press |date=August 16, 1981 |access-date=June 4, 2016 |archive-date=August 28, 2021 |archive-url=https://web.archive.org/web/20210828083317/https://news.google.com/newspapers?nid=1870&amp;dat=19810816&amp;id=9_EwAAAAIBAJ&amp;pg=2603%2C113296&amp;hl=en |url-status=live }}&lt;/ref&gt;&lt;ref&gt;{{cite news |title=It's all over for Ali after loss |url=https://news.google.com/newspapers?nid=2199&amp;dat=19811212&amp;id=XKUyAAAAIBAJ&amp;pg=3700,2405394&amp;hl=en |newspaper=Lawrence Journal-World |agency=Associated Press |date=December 12, 1981 |access-date=June 4, 2016 |archive-date=September 29, 2021 |archive-url=https://web.archive.org/web/20210929102632/https://news.google.com/newspapers?nid=2199&amp;dat=19811212&amp;id=XKUyAAAAIBAJ&amp;pg=3700,2405394&amp;hl=en |url-status=live }}&lt;/ref&gt;&lt;ref&gt;{{cite magazine |first=William |last=Nack |author-link=William Nack |title=Not with a bang but a whisper |url=https://www.si.com/vault/1981/12/21/826243/not-with-a-bang-but-a-whisper-after-losing-to-trevor-berbick-a-subdued-muhammad-ali-softly-admitted-that-his-illustrious-career-had-come-to-an-end |magazine=Sports Illustrated |date=December 21, 1981 |access-date=June 4, 2016 |archive-date=June 9, 2016 |archive-url=https://web.archive.org/web/20160609212952/http://www.si.com/vault/1981/12/21/826243/not-with-a-bang-but-a-whisper-after-losing-to-trevor-berbick-a-subdued-muhammad-ali-softly-admitted-that-his-illustrious-career-had-come-to-an-end |url-status=live }}&lt;/ref&gt;

3126 Leslie Felperin of ''[[The Guardian]]'' stated &quot;Although its final act shreds credulity, and the structure is a bit wonky, this pulpy crime thriller from Korea is still a real kick in the head. 3135 Perez's next assignment also became a very prominent fight in boxing history when, on March 24, 1975, [[Muhammad Ali vs. Chuck Wepner|Ali defended the world Heavyweight title versus Chuck Wepner]]. 3136 The series ''Art Brothel'' consists of 25 photographs of various sizes with plastic laminate backings. The artist's intention was to create an ironic, desecrating celebration of the system of contemporary art with an &quot;overtone of parody&quot;&lt;ref&gt;Marziani, p. 50.&lt;/ref&gt; and using references to cinema. Corte created the ''Art Brothel'' series in 1995, the year of the Venice Biennale centenary, so it is not surprising that this celebration is his first ironic reference. On the backstage of an actual film set, where Corte worked as a scenographer and actor, a group of professional male, female and transgender high-class prostitutes plays in sequences that allude to well-known paintings, techniques or artistic trends chronicling the history of art. The artist himself also appears in these sequences. To create the photographic series, Corte projected the sequences on a cinema screen, and then re-photographed them. The resulting photos were later printed and cropped by the artist, sometimes leaving at their edges a small portion of the screen on which the sequences were projected. Also, French subtitles, apparently disconnected from the various scenes, have been superimposed on the photographs. The titles of the single photos are indicative of the artist's intent, but the series contains more subtle references to cinematographic art. For example, the film set is located in a showroom on [[Via Veneto]] - the famous street in Rome that was featured in the 1960 film by [[Federico Fellini]] [[La Dolce Vita]], and the show room itself belongs to an Italian architect and interior designer of villas owned by [[Sylvester Stallone]].&lt;ref&gt;Marziani, p. 50.&lt;/ref&gt;

3166 In 1986, Kidd and his then girl-friend Alison Fisher came to New York and lived for two weeks in the [[Meatpacking District, Manhattan]], before they headed towards Tucson, Arizona, via Auto Driveway, where they bought a van in which they traveled around the USA for a year.&lt;ref&gt;{{cite web |last1=Leonardo |first1=Kathy |title=Interview: Jeremy Kidd |url=https://eattravelgo.com/stories/artist-interview-jeremy-kidd/ |website=Eat.Travel.Go |accessdate=15 February 2019}}&lt;/ref&gt; Kidd worked in migrant jobs, digging ditches and boxing mesquite trees in the Tucson desert for little money and under sometimes hottest weather conditions, alongside people with no social security cards. In 1987 he and Fisher arrived on the Westcoast. They first lived in Seattle, Washington, and then Portland, Oregon, and San Francisco, where they sold hand-painted art T-Shirts at craft fairs and galleries under the company name Fidget, [[Robin Williams]] being an early patron. Later they moved to the famed [[Topanga Canyon]] Ranch Hotel in Los Angeles where they sold their designer T-Shirts to upscale stores on [[Rodeo Drive]] in Beverly Hills to the movie stars of the time, such as by [[Silvester Stallone]], [[Steve Martin]], [[Chevy Chase]], etc. Kidd is also a surfer and surfed both in Topanga State Beach and Malibu Third Point. 3200 **Woodroar, the editor in question is one user from Bulgaria who has been bent on removing information for the sake of removing it, even if the entry has the full disclosure of &quot;archive footage&quot; for the Men in Black entry in Sylvester Stallone's filmography page. This user has been known to revert this at least several times in 2019, so no, I am not going to apologize for having a short fuse with that particular user.  In the case of the Halo characters, the character I removed only appeared in one novel and was never even implemented into any of the proper game entries whose only purpose was to be cannon-fodder.  I thought the idea of that particular list of characters is if they appeared in &quot;multiple mediums&quot; or primarily came from the games. 3202 **Woodroar, I did NOT accuse you of editing the Sylvester Stallone page, for the record. I was addressing YOUR QUESTION about the IP user in question. I did the geo-locator on the the anonymous IP in question, and it has been the same user reverting the data without rhyme or reason, despite the fact that archive footage of the actor was used in Men in Black. Less confused now? Good. As for me not bothering with the conversation. The IP user in question has a very poor level of reading comprehension, and it's obvious that particular IP user in question is not a native English user. | The [[Justice League]] wasn't the only DCEU property that saw redemption this year. In 2016, [[David Ayer]] made ''Suicide Squad'', and it was terrible. Jump to 2021, when [[James Gunn]] (director of Marvel's ''[[Guardians of the Galaxy (film)|Guardians of the Galaxy]]'' who jumped ship to DC after Disney temporarily fired him for some unsavory old tweets) made '''''The''' Suicide Squad'', a sequel/reboot/some weird combination of the two... and it was amazing! ''The Suicide Squad'' retains some [[Suicide Squad]] members from ''Suicide Squad'' (of course, Warner Bros. would never get rid of [[Margot Robbie]]'s [[Harley Quinn]]) but mostly follows a new set of characters including [[Idris Elba]]'s [[Bloodsport (character)|Bloodsport]], [[Sylvester Stallone]]'s [[King Shark]], and [[Daniela Melchior]]'s [[Ratcatcher (comics)|Ratcatcher]] as they attempt to destroy [[Starro the Conquerer]], a giant alien starfish.

'''''Creed III''''' is a 2023 American [[Sports film|sports]] [[Drama (film and television)|drama film]] starring and directed by [[Michael B. Jordan]] in his directional debut, and produced by Jordan, [[Irwin Winkler]], [[Charles Winkler]], William Chartoff, David Winkler, [[Ryan Coogler]], Elizabeth Raposo, [[Jonathan Glickman]], and [[Sylvester Stallone]]. It is the sequel to ''[[Creed II]]'' (2018), the third installment in the [[Creed (film series)|''Creed'' film series]], and the ninth overall in the [[Rocky (film series)|''Rocky'' film series]]. The film was written by Keenan Coogler and [[Zach Baylin]] from a story they co-wrote with Ryan Coogler. The film sees the accomplished and recently retired boxer [[Adonis Creed]] (portrayed by Jordan) come face-to-face with his childhood friend and former boxing prodigy Damian Anderson ([[Jonathan Majors]]). [[Tessa Thompson]], [[Jonathan Majors]], [[Wood Harris]], Mila Davis-Kent, [[Florian Munteanu]] and [[Phylicia Rashad]] also star.
A third ''Creed'' film was officially announced in September 2019, alongside Jordan's return; he was also confirmed to be making his directorial debut in October 2020. Majors and the remainder of the cast joined between November 2021 and September 2022; ''Creed III'' is the first film in the series not to feature Sylvester Stallone reprising his role as [[Rocky Balboa]], though he is credited as a producer. [[Principal photography]] began in January 2022 and lasted until that April, with filming locations including [[Los Angeles]], [[Tampa, Florida|Tampa]], and [[Georgia (U.S. state)|Georgia]].
In December 2018, in response to the suggestion that [[Deontay Wilder]] could play the son of [[Clubber Lang]] in a potential sequel to ''[[Creed II]]'' (2018), Sylvester Stallone and Michael B. 3225 Stallone expressed distaste for the darker direction the filmmakers wanted to take the film in, stating: &quot;That's a regretful situation because I know what it could have been. It was taken in a direction that is quite different than I would've taken it. It's a different philosophy - Irwin Winkler's and Michael B. Jordan's. I wish them well, but I'm much more of a sentimentalist. I like my heroes getting beat up, but I just don't want them going into that dark space. I just feel people have enough darkness.&quot;&lt;ref&gt;{{Cite web |last=Hibberd |first=James |date=2022-11-07 |title=Sylvester Stallone Gets Candid About Career, Regrets, Feuds: &quot;I Thought I Knew Everything&quot; |url=https://www.hollywoodreporter.com/feature/sylvester-stallone-interview-rocky-rambo-tulsa-king-1235254384/ |access-date=2024-02-11 |website=The Hollywood Reporter |language=en-US}}&lt;/ref&gt; He eventually refused to see the film when it was released due to the involvement of producer [[Irwin Winkler]], whom Stallone has called a &quot;parasite&quot; for &quot;picking clean the bones&quot; of characters he (Stallone) created. 3267 Critic [[Lav Diaz]] noted ''Chinatown''{{'}}s intense violence, which he thought was influenced by the films of [[Arnold Schwarzenegger]] and [[Sylvester Stallone]], and he expressed mixed feelings over the varying quality of the film's action scenes. The film received four [[FAMAS Award]] nominations, winning [[FAMAS Award for Best Picture|Best Picture - Action]] and Best Sound (Rolly Ruta).
3268 [[Lav Diaz]], writing for the ''[[Manila Standard]]'', saw the film as another Filipino work influenced by the intense violence of films starring [[Sylvester Stallone]] or [[Arnold Schwarzenegger]], stating that &quot;Children too, [are] riddled with bullets.&quot; He gave mixed feelings for the action sequences, praising the chase scene involving a car and the action scenes at the start and the end of the film, but criticizing others for being basically filler. Diaz considers the love scene between Revilla's character and his lover to be the film's most memorable moment.&lt;ref name=&quot;MSDiaz&quot;&gt;{{cite news|last=Diaz|first=Lav|authorlink=Lav Diaz|title=Isa pang Rambo|trans-title=Another Rambo|url=https://news.google.com/newspapers?nid=8cBNEdFwSQkC&amp;dat=19881217&amp;printsec=frontpage&amp;hl=en|accessdate=August 3, 2020|work=[[Manila Standard]]|publisher=Manila Standard News, Inc.|date=December 17, 1988|page=15|language=Filipino|quote=Pati bata, tadtad sa bala.}}&lt;/ref&gt;

3276 &quot;'''Winner Takes It All  '''&quot; is a 1987 rock song written by record producer [[Giorgio Moroder]] and [[Tom Whitlock|Thomas Whitlock]] and recorded by [[Sammy Hagar]]. Originally was included in the [[soundtrack]] of the [[Sylvester Stallone]] movie ''[[Over the Top (1987 film)|Over the Top]]'', being the first track and second single from the album, released through [[CBS Records International|CBS Records]]. The song peaked at No. 3 on the ''Billboard [[Mainstream Rock (chart)|Album Rock Tracks]]'' chart&lt;ref&gt;[https://www.billboard.com/artist/sammy-hagar/chart-history/rtt/ Billloard Mainstream Rock Chart]&lt;/ref&gt; and No. 54 on their ''[[Billboard Hot 100|Hot 100]]'' chart.&lt;ref&gt;[https://www.billboard.com/artist/sammy-hagar/chart-history/hsi/ Billboard Hot 100 Chart ]&lt;/ref&gt; It appears in Hagar's 2004 compilation album ''[[The Essential Red Collection]]''.

3302 :'''Comment''' - The assertion that &quot;a nomination to delete based on the fact that she was a relative of somebody who was more known doesn't carry itself as a strong argument in my opinion&quot;. My biggest issue with that statement is that Gladys Pearl Baker literally has no other claim to notability other than being the mother of Marilyn Monroe. Yes, some notable people have notable parents. Some notable people have parents that become notable after their children have become notable for something other than being their parents. But the claim to notability for a Wiki entry shouldn't be merely for being the parent of someone notable. You mentioned [[Jackie Stallone]] elsewhere. While Jackie Stallone may have initially became notable for being the mother of Sylvester Stallone, she became notable in her own right for other endeavors. Gladys Pearl Baker has only ever been notable for being Marilyn Monroe's mother. The opening paragraph first lists her as a film editor. She wasn't a notable film editor. 3333 Munteanu had his first film role in ''Bogat'', a 2016 German-Romanian film shot in Munich.&lt;ref name=facts/&gt; His breakthrough in acting came in 2018, when [[Sylvester Stallone]] was looking for a European heavyweight boxer to play Viktor Drago, the son of [[Ivan Drago]], in the sports drama sequel ''Creed II''. Stallone found Munteanu through training videos on the Internet and personally promoted him for the role.&lt;ref name=r1/&gt; At that time Munteanu was {{convert|6|ft|4|in|cm|abbr=on}} tall and weighed ca. {{convert|245|lb|kg|abbr=on}}, but had to shed ca. {{convert|20|lb|kg|abbr=on}} for the role.&lt;ref name=r3/&gt;

3337 |text=Tom Fitzgerald and I are not brothers. We look nothing alike. I'm considered a combination of [[John Wayne]], [[Sylvester Stallone]] and [[Paul Newman]], whereas Tom is... well... pretty much your average, forgettable type... I bring up the brother business merely to forestall the occasional cynic who might say I wrote this piece simply because I'm related to the subject. True, I call him Uncle Tom, but only out of respect, as [[Amy Carter]] would call [[Hamilton Jordan]] Uncle Ham... His story-telling talent made Fitzgerald a frequent between-periods radio and television guest, and he reportedly holds the [[Guinness World Records|Guinness record]] for the accumulation of complimentary raincoats, Panasonic radios and [[A. 3338 After a long spell performing in direct-to-video films since 1995, Lundgren returned to Hollywood in 2010 with the role of [[List of The Expendables characters#Gunner Jensen|Gunnar Jensen]] in ''[[The Expendables (2010 film)|The Expendables]]'', alongside [[Sylvester Stallone]] and an all-action star cast. He reprised his role in ''[[The Expendables 2]]'' (2012) and ''[[The Expendables 3]]'' (2014). Also in 2014, he co-starred in ''[[Skin Trade (film)|Skin Trade]]'', an action thriller about human trafficking he co-wrote and produced. 3339 The first date takes place three years after the film's release, which places the film entirely in the near future. The date appears on a computer screen as the day when [[Sylvester Stallone]]'s character John Spartan is cryogenically imprisoned for crimes he did not commit.
3340 Winkler then moved back to New York, working in theater, television commercials, and the independent film ''[[The Lords of Flatbush]]'' (1974), with then unknown [[Sylvester Stallone]]. After a short period in Los Angeles, he won the role of [[Fonzie|Arthur &quot;Fonzie&quot; Fonzarelli]] (on the 1974-1984 American television series ''[[Happy Days]]''). He also portrayed Jack Dunne in ''[[Heroes (1977 film)|Heroes]]'' (1977), Andy in the [[Carl Reiner]] film ''[[The One and Only (1978 film)|The One and Only]]'' (1978), and Chuck Lumley in [[Ron Howard]]'s ''[[Night Shift (1982 film)|Night Shift]]'' (1982). 3343 '''Stakar Ogord''' (portrayed by [[Sylvester Stallone]]) is a legendary Ravager captain and the leader of the Stakar Ravager Clan. Ogord saved Yondu Udonta from a life of slavery to the Kree and welcomed him to the Ravagers, but was later forced to exile him for engaging in child trafficking, thus violating the Ravager code. He joins the other Ravager clans at honoring Yondu during his funeral after his sacrifice to save Peter Quill. In a mid-credits scene, Stakar and Martinex reunite with their old teammates Charlie-27, Aleta Ogord, Mainframe, and Krugarr. He later aids the Guardians in their infiltration of the Orgoscope space station during their search of a passkey to disable the kill switch in Rocket's heart and save his life.

3356 ¦ The [[Justice League]] wasn't the only DCEU property that saw redemption this year. In 2016, [[David Ayer]] made ''Suicide Squad'', and it was terrible. The departure from these established iconographic conventions, Kapur argues, is made possible by &quot;the making of a virile Hinduism,&quot; which accompanies the encroachment of &quot;realism,&quot; and particularly the depiction of a &quot;virile&quot; physiognomy, onto the mythic or iconic image.}}&lt;/ref&gt;]]

3368 Stuart was hired by [[20th Century Fox]] to adapt Thorp's novel into a screenplay in 1987. 3398 :I tend to agree. Many things which appear &quot;random&quot; to one person may be perfectly meaningful to another. I used the example on the policy discussion page-what if I spelled out my first name in ASCII hex code? That would be meaningless gibberish to anyone who doesn't know what it is, but would make perfect sense to anyone who knows how to read it. What about foreign names? Do all admins know all foreign languages? Foreign words? The list of problems this policy could cause go on and on. Username policy should be applied as '''narrowly''' as possible, and only when the username in question is itself a form of vandalism (includes slurs/obscenities/advertising/etc.), or obviously confusing or bad faith (&quot;Sylvester Stallone (unless it can be verified that's really who it is!), an obvious attempt to impersonate another user, that type of thing), it should be allowed. If the user turns out to be a vandal, well, ban 'em for vandalism. As for &quot;hard to type&quot;-that's a silly argument, these newfangled computer thingies have included copy and paste functionality for years and years now, and I don't imagine that going away anytime soon. J. Watt, Aaron Rodgers, Ben Roethlisberger and more in the columns of newspapers and books, but don't forget that there was one of the Principals of Samthong High School and one of the teachers who joined General Vang Pao's army to protect the American soldiers. All this deserves to be said and quoted here, especially in my article &quot;Samthong college&quot;. Do you have to have courage like these people to protect someone from elsewhere for good or for worse? it was courage that they did and defended the american soldiers. Not only Tou-Fu Vang, who was the Head Director, there was Wangyee Vang who was a teacher, then there was also Phon Yang. They put their lives on the line to protect others without realizing what is about to happen, so their careers and lives don't deserve to say &quot;notability&quot; value here in this article? However, there is Lormong Lo who has started his studies at Samthong College. It does not deserve to quote here? And you, during this time, where were you? 3418 ::::I said ''&quot;either '''mostly''' or '''only''' their own films&quot;'', which is exactly what those categories represent. ''Syncopy Inc. films'' only has two films that weren't directed by Nolan, ''Infinitum Nihil films'' only has one film that Depp hasn't worked in, and the same goes for the other categories I listed, most of the films were either directed by or starring the person who owns the company, they all started out by producing their own films. And there's also {{lc|Balboa Productions films}}, with only 2 films and both of them starring Sylvester Stallone, and there are probably other categories in the same situation. Either we get rid of all of them and create a new rule or leave it as it is right now. Why only minor/independent studios need to be removed? 3446 *:&quot;Defining&quot;, according to this very debatable criterion of the English Wikipedia only (other language-versions of Wikipedia are more flexible) meant to fight &quot;[[:Wikipedia:Overcategorization|overcategorization]]&quot; (i.e. too many categories for each article), signifies essentially a quality that would be mentioned in the lead section of the article. For example : the lead section of the article about Sylvester Stallone mentions that he is an American actor and filmmaker (so these categories are OK), not that he is an Officer of the Order of Arts and Letters (so although he indeed received this honour, this category is not OK, according to the English Wikipedia rule). I feel this rule is too stringent, and I agree that these awards are exclusive, but if this rule is applied stringently to delete &quot;Category:Recipients of the Order Pro Merito Melitensi&quot;, it should be applied to all categories for recipients of orders of merit, which are never the main defining characteristic for the persons who receive them. It is rather a consequence of other defining characteristics. See these pages : [[Wikipedia:Defining]] and [[Wikipedia:Overcategorization]]. I have not been able to find when and where this rule was created, and where it can be debated. [[User:Baronnet|Baronnet]] ([[User talk:Baronnet|talk]]) 14:51, 31 March 2023 (UTC)

He claims that his firm has filed more lawsuits against the media than any other law firm. His law firm Lavely &amp; Singer has been described as &quot;one of Hollywood's go-to law firms&quot;.&lt;ref name=&quot;:0&quot; /&gt;
Singer successfully represented photographer Max Aguilera-Hellweg in a lawsuit against Arnold Schwarzenegger, who was accused of using a photo without permission for a [[Bodybuilding|body-building]] calendar. His victory caught the attention of Schwarzenegger's lawyer, Jake Bloom, who then referred both Schwarzenegger and Sylvestor Stallone to Singer for assistance with their legal issues. He would go on to assist Schwarzenegger in two lawsuits brought by women claiming they were smeared by political aides, with one suit eventually settled and the other dismissed.&lt;ref name=&quot;:2&quot; /&gt;
Singer gained [[Tabloid journalism|tabloid]] attention in 1999 when [[Sylvester Stallone]] enlisted his services to counter a lawsuit filed by five former household employees. The workers claimed they experienced &quot;unusual directives&quot; from Stallone and [[Jennifer Flavin]], leading to their termination without full compensation, prompting a demand for $1.5 million in damages. One peculiar claim was an order to avoid communication or eye contact with Stallone's mother, Jackie. The staff, however, broke this rule when Jackie gifted them pens and autographed photos of herself for Christmas. Stallone and Flavin allegedly fired them upon discovering the breach. Singer vigorously refuted the allegations, stating they aimed to exploit the celebrity factor. He further contended that the workers were employed through a temporary agency on short-term contracts and highlighted the claim that one of the employees wore high heels while cleaning the house.&lt;ref name=&quot;:6&quot;&gt;{{Cite news |last=White |first=Adam |date=2017-11-08 |title=Hollywood's master of denial: meet Marty Singer, the lawyer who makes celebrity problems go away |language=en-GB |work=The Telegraph |url=https://www.telegraph.co.uk/films/0/hollywoods-master-denial-meet-marty-singer-lawyer-makes-celebrity/ |access-date=2023-08-07 |issn=0307-1235}}&lt;/ref&gt;

::: &quot;if a name cannot be verified in reliable sources ... then it has no place in that biography&quot; is true, but wouldn't seem to amount to a revdel/OS rationale, which is what this seem to be about. E.g., I could get high and go vandalize the [[Sylvester Stallone]] article to say that his birth name was &quot;Yojimbo Z. Doodah&quot;, but that would not be worth doing anything about other than a revert (and maybe a short block). It seems to be that there has to be both a credible claim that the name is legit, and a credible claim that there is an unusual privacy reason to suppress it. &lt;span style=&quot;white-space:nowrap;font-family:'Trebuchet MS'&quot;&gt;-[[User:SMcCandlish|'''SMcCandlish''']] [[User talk:SMcCandlish|☏]] [[Special:Contributions/SMcCandlish|¢]] 😼 &lt;/span&gt; 21:02, 26 September 2023 (UTC)

But, this poor man's &quot;Star Trek&quot; has little more to offer than a basic, good-vs.-bad-guys plot with lots of ham overacting. ... The film-titled Space Marines begin a rescue-and-arrest mission that quickly turns into a volatile political situation. Ordered to return to base, but aware of the mounting threat to the galaxy's survival, the elite Marine Corps stages its own vigilante plan. It's easy to guess the predictable outcome, which includes a daring mutiny and eventual pirate confrontation. There's much futuristic space hardware in the meandering movie, including a spacecraft resembling a giant electric shaver. Even with that, over all, &quot;Space Marines&quot; hasn't got much buzz.&quot;&lt;/li&gt;

3545 ''Tulsa King'' is a streaming television series that is notable for being Sylvester Stallone's scripted television debut. The series is pretty well known for Stallone's performance. It has also set a few viewership records and has been the subject of a little controversy during second season production. In 2023 the series was nominated for a Creative Arts Emmy. Throughout the last few months I have put quite a bit of work into this article expanding it from a lower end C class all the way to GA. I believe it's now comprehensive enough to meet FA requirements. This will be my third FAC, and hopefully my second successful FA. I look forward to addressing any comments or concerns. 3562 I've listed this article for peer review because I am hoping to eventually turn it into a featured article. ''Tulsa King'' is a fantastic crime and comedy drama starring the one and only Sylvester Stallone. Just this year I have expanded it from basically a stub and turned it into a well fleshed out good article. I nominated it for FA shortly after, but it was quickly closed and suggested that it go through GOCE and PR. The copy edit was just recently performed, so I'm hoping to work out any other issues in this review before I send it back to FAC. {{smiley}}

// 0x00000040
// Process whose threads run only when the system is idle. The threads of the process are preempted by the threads of any process running in a higher priority class. An example is a screen saver. The idle-priority class is inherited by child processes.

// NORMAL_PRIORITY_CLASS
// 0x00000020
// Process with no special scheduling needs.

// HIGH_PRIORITY_CLASS
// 0x00000080
// Process that performs time-critical tasks that must be executed immediately. The threads of the process preempt the threads of normal or idle priority class processes. An example is the Task List, which must respond quickly when called by the user, regardless of the load on the operating system. Use extreme care when using the high-priority class, because a high-priority class application can use nearly all available CPU time.

// REALTIME_PRIORITY_CLASS
// 0x00000100
// Process that has the highest possible priority. The threads of the process preempt the threads of all other processes, including operating system processes performing important tasks. For example, a real-time process that executes for more than a very brief interval can cause disk caches not to flush or cause the mouse to be unresponsive.

!!!!!!!!!!!!!!!!!!!!!!!! BENCHMARKING GNU's memmem vs Railgun !!!!!!!!!!!!!!!!!!!!!!!! [
Add-on: 2016-Aug-22

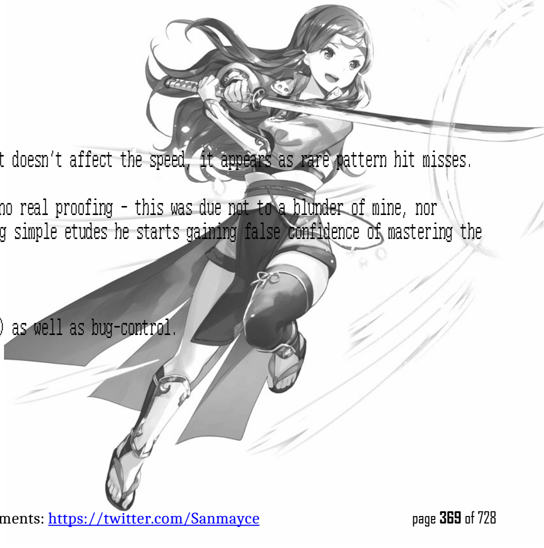
Two things.

First, the fix from the last time was buggy, my apologies, now fixed, quite embarrassing since it is a simple left/right boundary check. It doesn't affect the speed, it appears as rare pattern hit misses.
Since I don't believe in saying "sorry" but in making things right, here my attempt to further disgrace my amateurish work follows:
Two years ago, I didn't pay due attention to adding 'Swampwalker' heuristic to the Railgun_Ennearch, I mean, only quick test was done and no real proofing - this was due not to a blunder of mine, nor
        carelessness, but overconfidence in my ability to write "on the fly". Stupid, indeed, however, when a coder gets momentum in writing simple etudes he starts gaining false confidence of mastering the
        subject, not good for sure!
Hopefully, other coders will learn to avoid such full of neglect style.

Second, wanted to present the heaviest testbed for search i.e. memmem() functions: it benefits the benchmarking (speed in real application) as well as bug-control.

The benchmark is downloadable at my INTERNET drive:
https://1drv.ms/u/s!AmWWFXGMzDmEglwjlUtnMJrfhosK

The speed showdown has three facets:
- compares the 64bit code generated from GCC 5.10 versus Intel 15.0 compilers;
- compares four types of datasets - search speed through English texts versus genome ACGT-type data versus binary versus UTF8;
```



- compares the tweaked Two-Way algorithm (implemented by Eric Blake) and adopted by GLIBC as memmem() versus my Railgun_Swampshine.

Note1: The GLIBC memmem() was taken from latest (2016-08-05) glibc 2.24 tar:
https://www.gnu.org/software/libc/
Note2: Eric Blake says that he enhanced the linearity of Two-Way by adding some sublinear paths, well, Railgun is all about sublinearity, so feel free to experiment with your own testfiles (worst-case-scenarios), just make such a file feed the compressor with it, then we will see how the LINEAR Two-Way behaves versus Railgun_Swampshine.
Note3: Just copy-and-paste 'Railgun_Swampshine' or 'Railgun_Ennearch' from the benchmark's source.

So the result on Core 2 Q9550s @2.83GHz DDR2 @666MHz / i5-2430M @3.00GHz DDR3 @666MHz:

```

Note0: Railgun_Trolldom is slightly faster (both with Intel & GCC) than Railgun_Swampshine, this is mostly due to adding a bitwise BMH order 2 (8KB table overhead instead of 64KB) path - for haystacks <77777 bytes long - the warm-up is faster.
Note1: The numbers represent the rate (bytes/s) at which patterns/needles 4,5,6,8,9,10,12,13,14,16,17,18,24 bytes long are memmemed into 4KB, 256KB, 1MB, 256MB long haystacks.
in fact, these numbers are the compression speed using LZSS and memmem() as matchfinder.
Note2: The Arabian Nights is downloadable at:
https://ebooks.adelaide.edu.au/b/burton/richard/b97b/complete.html
Note3: On i5-2430M, TW is catching up since this CPU crunches instructions faster while the RAM speed is almost the same, Railgun suffers from the slow RAM fetches - the prefetcher and such suck.
Note4: With a simple English text 'Tales of 1001 Nights', 15,583,440 bytes long, the cumulative size of traversed haystack data is nearly 100TB, 105,631,163,854,099 ~ 1024^4 = 1,099,511,627,776.
Note5: With a simple French text 'Agatha_Christie_85-ebooks_(French)_TXT.tar', 32,007,168 bytes long, the cumulative size of traversed haystack data is nearly 200TB ~ 234,427,099,834,376.

Just to see how faster is Yann's Zstd in decompression (its level 12 is 377-331 MB/s faster), on Core 2 Q9550s @2.83GHz DDR2 @666MHz:

Two-Way is significantly slower than BMH Order 2, the speed-down is in range:
- for TEXTUAL ANSI alphabets: 1729/226= 7.6x
- for TEXTUAL UTF8 alphabets: 2898/760= 3.8x
- for TEXTUAL ACGT alphabets:  458/109= 4.2x
- for BINARY-esque alphabets:  580/144= 4.0x

For faster RAM, than mine @666MHz, and for haystacks multimegabytes long, the speedup goes beyond 8x.

The benchmark shows the real behavior (both latency and raw speed) of the memmem variants, I added also the Thierry Lecroq's Two-Way implementation:
http://www-igm.univ-mlv.fr/~lecroq/string/node26.html#SECTION00260
However, Eric Blake's one is faster, so it was chosen for the speed showdown.

Once I measured the total length of traversed haystacks, and for files 100+MB long, it went ... quintillion of bytes i.e. petabytes - good torture it is.

// 2014-Apr-27: The nasty SIGNED/UNSIGNED bug in 'Swampshines' which I illustrated several months ago in my fuzzy search article now is fixed here too:
/*
The bug is this (the variables 'i' and 'PRIMALposition' are uint32_t):
Next line assumes -19 >= 0 is true:
if ( (i-(PRIMALposition-1)) >= 0) printf ("THE NASTY BUG AGAIN: %d >= 0\n", i-(PRIMALposition-1));
Next line assumes -19 >= 0 is false:
if ( (signed int)(i-(PRIMALposition-1)) >= 0) printf ("THE NASTY BUG AGAIN: %d >= 0\n", i-(PRIMALposition-1));
And the actual fix:
...
// If we miss to hit then no need to compare the original: Needle
if ( count <= 0 ) {
// I have to add out-of-range checks...
// i-(PRIMALposition-1) >= 0
// &pbTarget[i-(PRIMALposition-1)] <= pbTargetMax - 4
// i-(PRIMALposition-1)+(count-1) >= 0
// &pbTarget[i-(PRIMALposition-1)+(count-1)] <= pbTargetMax - 4

// "FIX" from 2014-Apr-27:
// Because (count-1) is negative, above fours are reduced to next twos:
// i-(PRIMALposition-1)+(count-1) >= 0
// &pbTarget[i-(PRIMALposition-1)] <= pbTargetMax - 4
        // The line below is BUGGY:

        //if ( ((signed int)(i-(PRIMALposition-1)+(count-1)) >= 0) && (&pbTarget[i-(PRIMALposition-1)] <= pbTargetMax - 4) ) {
// FIX from 2016-Aug-10 (two times failed to do simple boundary checks, pfu):
